

Postdoctoral Positions Available in Simulation Studies of Supercooled Liquids and Glass Transition

The WPI Advanced Institute for Materials Research, Tohoku University invites applications for Postdoctoral positions to work in the area of theoretical and simulation study of structure and dynamics in glass-forming liquids. A Ph.D. is required in Chemistry, Computer Science or Physics, or related field, with expertise in statistical physics and/or advanced simulation and modeling, and in programming in C or Fortran. The positions are for two years in the first instance with the possibility of renewal. The starting date is as soon as possible. Starting Salary: 5 million Japanese Yen for new PhD candidates (negotiable for seniors)

Available date: Anytime from July 1, 2008.

Place: Tokuyama Laboratory, WPI Advanced Institute for Materials Research, Tohoku University, Sendai, Japan.

Please send applications along with

- (1) Curriculum vitae,
- (2) Outline of research accomplishments, and research proposal at WPI,
- (3) Copies of five significant publications and a list of whole publications, and
- (4) two letters of recommendation from physicists or chemists to: Professor Michio Tokuyama.

For more information, please contact Michio Tokuyama
